PABCO - CHILDERS METALS

February 25, 2008

To Our Valued Business Partners

We would like to take this opportunity to inform you concerning an upcoming price increase on both aluminum and stainless steel products effective April 2, 2008. Since the beginning of this year, aluminum and stainless steel have continued to increase throughout the global markets. There are several factors contributing to the escalation including: higher energy costs, strong demand worldwide, and tightening supply of composite materials. Therefore, we will increase prices on all metal jacketing products as listed below:

Aluminum Rolls & Sheets	17%
Aluminum Fittings & Accessories	8%
Stainless Rolls & Sheets	4%
Stainless Fittings & Accessories	4%

We are committed to continuing to provide you with quality manufactured jacketing products, and we appreciate your support on these matters. If we can help provide you with any further details on this announcement, please contact your local Regional Sales Manager.

Thank you for consideration,

Greg Todd
National Sales Manager
